Abstract—**JustNote online app allows users to create notes, which will be text.**

Index Terms—**HTML, CSS, Bootstrap, PHP, MySQL, AJAX**

I. Introduction

Write anything to make it as a note. User can make as many as note user wants.
Every user will have individual account for saving their notes.
There will be landing page, my note page & profile page.

II. Literature Review

Evernote is an app designed for note taking, organizing, task management, and archiving. It is developed by the Evernote Corporation, headquartered in Redwood City, California.
The app allows users to create notes, which can be text, drawings, photographs, audio, or saved web content. Notes are stored in notebooks and can be tagged, annotated, edited, searched, given attachments, and exported.

III. Proposed Methodology

Landing page will contain Signup, Login, Remember me & Forgot password options. After successful login, user will land in My Note page contain All Notes, Edit Notes, Delete Notes options. On the Profile page, user can Update email and password.

IV. Future Work

In the future, users will create notes which can be drawings, photographs, audio, video or web content. Notes are stored in notebooks and can be tagged, annotated, edited, searched, given attachments, and exported.

Acknowledgment

I would like to thank my honourable **Khan Md. Hasib Sir** for his time, generosity and critical insights into this project.
